Subjects

Classification System

Consumer Demand
Production Economics and Supply
Agricultural Products: price analysis, subsector models, marketing, futures
Agricultural Inputs: land, labor, finance
Natural Resources: energy, conservation, land use, water, forestry, fisheries
Environmental Economics: pollution, regulation, nonmarket valuation
Agricultural and Food Policy: regulation, taxation, welfare
Economic Development: developing economies, aid, regional, general equilibrium
International Economics: trade, integration
Industrial Organization and Market Structure
General: teaching, extension, research methodology, professional
